To be explicit we pay of a numbers any out a main and a tures \$84,000. mer explicit we pay of annumers say pressort making an distures 884,000, 000 to keep 185,128; it aun'acturers in Canada. It she gate worth the candle? That's the question. The greater Macdondd in advocating the National Policy of 1875, said it would not be nece sary o wontime these high duties many years all manufacturers would be able to stand all outside can petition. The lesser Macdondds say it is necessary to continue the rindefinitely subjecting the people to business we have described above. But the lessons of the tables above do not end with the burdens we have set forth above. In 1881 \$59, 429,002 expended bardens we have described above. But the lessons of the tables above do not the lessons of the tables above do not made with the burdens we have set forth above. In 1881 \$59, 429,002 expended in wages produced \$209,076,008 in products or \$5.21 in products for every \$1.90 paid in wages, and under the continued distering \$1.90 in wages produces but \$4.75 in products. Now all this proves one of two things either the present tariff by taxing many raw materials is operating unfavorably to the legitimate extension of manufactures, or labor is employed to a disadvantage in some channels. One of these results is further proved by the fact that \$165,302,623 capital invested in 1881 produced \$309,676,098 worth of products or about \$1.95 per \$1.60 when in 1891 \$354,620,750 produced but \$476,198,856, or about \$1.30 per \$1.00 when in 1891 \$354,620,750 produced but \$476,198,856, or about \$1.30 per \$1.00 when in 1891 \$354,620,750 produced but \$476,198,856, or about \$1.30 per \$1.00 when in 1891 \$354,620,750 produced but \$476,198,856, or about \$1.30 per \$1.00 when in 1891 \$354,620,750 produced but \$476,198,856, or about \$1.30 per \$1.00 when in 1891 \$354,620,750 produced but \$476,198,856, or about \$1.30 per \$1.00 when in 1891 \$354,620,750 produced but \$476,198,956, or about \$1.30 per \$1.00 when the manufacturers have made annually more than 10 per cent, they have added to capital osay nothings of felor investments in residential properties and outside, speculations their output has increased but about \$20 per cent. Irrigation Come to Stay.

Mr. L. A. Hamilton, of the C. P. R. land department, returned recently to Winniper from a business trip to the west. While away Mr. Hamilton visited Rigina, Calgary and Band. He reports the crops of Indian Head to be further advanced than at this time any other year. There has been pienty of rain followed by bright surchine. "What struck me most in that country," said Mr. Hamilton, "was their rigation which is going on. Government survey parties are working from the Bow river as fareats as Swift Current, and ditches are being put in everywhere for the supply of water. Hamstrongly inclined to think that irrigation his come to stay and I think that credit is due the department of the interior for the manner in which it has been worked."

At Portage la Prairie last week Jo Hazleton was fined \$150 and costs selling liquor without a license.

There was a severe thunder storm on Sunday morning last, which caused some danage in this district. The electric fluid ent-red air R. P. Fraser's new barn in Clanwilliam, killing two horses, a bull and one cow. The hired m awas in the oarn at the time but rescribed no highly. Mr. Geo, Fraser who was outside near one of the boards off the barn, ripped up the shingles, splintered several posts and set fire to a pile of hay which had been unloaded in the barn the previous day. Mr. Fraser discovered the fire at once and managed by threshing it with a pole and throwing a couple of pais of water over it to extinguish it. The barn is a new one only finished the day before.
